DLLE Event Coordinator: Dr. Avani Kanakia

Student Manager: Aqsa Jairajpuri & Lubna Shaikh

The Department of Lifelong Learning and Extension (DLLE), in collaboration with the Environment Cell of Humera Khan College of Education, organized an engaging Online Quiz on “Climate Smart Citizens Building Knowledge for Action” in the college premises. The initiative aimed to create awareness about climate change, sustainable practices, and eco-friendly lifestyle choices among students and staff. The quiz served as an interactive platform to enhance climate literacy and encourage individuals to take small yet impactful steps toward a sustainable future. It also inspired participants to reflect on their own environmental habits and think critically about solutions for a greener tomorrow. A total of 92 participants actively took part in the quiz, showcasing their knowledge and enthusiasm for environmental preservation. The questions were designed to test awareness while also motivating participants to learn new facts about global warming, renewable energy, and conservation methods. All participants were awarded e-certificates as a token of appreciation for their active participation and interest in environmental causes. The event was successfully conducted under the valuable guidance of Dr. Avani Kanakia (Event In-Charge). Student Managers Aqsa Jairajpuri and Lubna Shaikh efficiently coordinated and managed the smooth execution of the quiz, ensuring active involvement, timely responses, and a positive learning experience for all. Their teamwork and dedication contributed to the success of the event.

Learning Outcome:

Participants gained a better understanding of key environmental concepts, climate challenges, and practical measures to contribute toward sustainability. The quiz helped reinforce the importance of becoming responsible, climate-conscious citizens capable of translating awareness into everyday eco-friendly actions. It also fostered a sense of shared responsibility and encouraged everyone to take small, consistent steps toward protecting our planet. 🌱🌍
